Gym and fitness system is a unique software solution, which manages and control the day-to-day crowd and store crucial data in one single interface.

Mainly it is a management and accounting system, built for the cloud to work seamlessly across an internet connection.

In addition, it manages all integrated systems from one interface such as; financial accounting, Human Resources module, Inventory, clients, and purchases (Standard module), it furthermore could integrate with responsive website design and mobile application.

The system's main power is centralized in multi-functionalities, it allows system users to insert an infinite number of coaches and members.

Why Choose **Softex** ?

Since 2004, Softex Software House provides an outstanding set of unique solutions built for the cloud and serving the business structures in Egypt , gulf , and middle east.

Softex continuously develops its software product and perfects its functionality.

Intuitive and easy to use gym management system, this cloud-based system is designed to maximize business productivity in clubs of all sizes; fitness centers, gyms, and sports centers. It provides a set of reports and statistics that are indispensable for any training center.

Why to work on cloud Database?

In the case of multiple branches, the least expenses. And in the case of a single branch, safety too :

- ⦿ A registry of users with backup copies.
- ⦿ No need for technical support.
- ⦿ No need to purchase and update servers / databases.
- ⦿ Get Automatic software updates.
- ⦿ Multiple users of the system.
- ⦿ Advantages of getting a website or a linked mobile application with the same data.

Inputs :

Member's data.
