Softex Software House

Author: Marketing Department

Data Centers

Suitable for all websites using PHP, MY SQL Databases and built using Softex Standard Components and Technologies. Softex Host using specially hardened Unix Operating Systems that provides Additional top level protection for your website and emails. Unix OS are capable of hosting any web application that runs on any Linux Server with even more stability, security and performance for your applications.

Softex Provide only Hosting on its Dedicated Servers hosted by Class A Data Centers in Texas - United states. These world-class datacenters contain top of the line technology to ensure that servers stay cool, secure, and up at all times. The datacenters feature redundant power, HVAC, and fire detection systems, and are monitored 24/7 by both In House Technical teams and The Planet's Network Operation Centers.

In addition to a fully redundant network and top of the line data centers, Data Center system administrators monitor all of Softex servers 24 hours a day, 7 days a week. Servers are monitored and issues are acted upon before they become serious. Additionally, the network and datacenters are monitored and managed by on-site technicians dedicated to ensuring maximum uptime and reliability.

System Hot Fixes, Batches and upgrades are installed for all Softex Servers as soon as they are available and revised to be applied on All Softex Hosting Accounts without any charges.
